

SKILLS SUMMARY

• Languages:	C, C#, C++, Go Lang, Elixir, Java, Python, TypeScript, JavaScript
• Frontend:	React.js, React Native, Angular, Vue.js, Svelte, Next.js, ,Bootstrap, SASS, TailwindCSS, FlutterFlow.
• Backend:	Node.js, NPM, PHP, AWS, Azure, GoogleCloud
• Tools:	Power BI, Excel, PowerPoint, Tableau, MySQL, Amazon DynamoDB, Cassandra, Supabase, SQLite, Blender,
• Platforms:	PyCharm, Jupyter Notebook, Visual Studio Code, IntelliJ IDE, Flutterflow, GCP,
• Soft Skills:	Rapport Building, Strong Stakeholder management, People Management, Excellent communication

PROJECTS

- HealthDoc [link](#)

Tech Stack used: Next.js 14, TypeScript, Tailwind, Python/FastAPI, Node.js/Fastify, Prisma, PostgreSQL, Redis, Qdrant, Docker, Supabase, OpenAI GPT-4o-mini, Vercel, Railway

 - Built an AI medical-report platform with OCR upload, dual clinical/patient summaries, and key health insights.
 - Integrated GPT-4o-mini + RAG (Qdrant) for context-aware Q&A and abnormality detection (High/Low/Critical).
 - Developed secure microservices (Fastify + FastAPI) with family tracking, 2FA, audit logs, and cloud deployment.
- VulnScanner [link](#)

Tech Stack used: Next.js 14, TypeScript, Tailwind, Fastify, Playwright, Supabase, PostgreSQL, Framer Motion, Docker, Vercel, Railway, Sentry

 - Built an AI-powered URL threat intelligence platform with deep web crawling (Playwright), real-time scan progress via WebSockets, and executive security dashboards.
 - Engineered a vulnerability detection engine identifying XSS, SQL injection, SSRF, and insecure headers with severity-based findings and remediation guidance.
 - Implemented secure microservices (Fastify + Next.js) with Google OAuth, TOTP-based 2FA, Row Level Security, scheduled cron scans, and CI/CD pipeline.
- AI CodeMate [link](#)

Tech Stack used: Next.js 14, React 18, TypeScript, Tailwind CSS, Monaco Editor, Supabase, Gemini API, Yjs, Socket.IO, Sentry, Hugging Face (Qwen 2.5 Coder), Docker, Vercel, Railway

 - Built a browser-native AI IDE with Monaco Editor, live preview, device simulation, and real-time diagnostics for 50+ languages.
 - Integrated multi-provider AI assistant (Gemini, Hugging Face, Ollama, OpenRouter) for context-aware explain, refactor, optimize, and bug detection.
 - Developed real-time collaboration using Yjs CRDTs + Socket.IO with cursors, Git workflows, diff viewer, and GitHub OAuth repo import.
- ThreatForge [link](#)

Tech Stack used: Next.js 14, TypeScript, React, Bootstrap, Python/Flask, FastAPI, scikit-learn, Supabase, Redis, Docker, Prometheus, Grafana, Vercel, Railway, Hugging Face Spaces

 - Built an AI cybersecurity platform with ML-based malware, steganography, and network anomaly detection using scikit-learn.
 - Integrated YARA engine, threat intel feeds, geo-mapped dashboard, and automated PDF security report generation.
 - Developed secure microservices (Flask + FastAPI + ML) with JWT, TOTP MFA, Google OAuth, WebSocket alerts, and Prometheus/Grafana monitoring.
- GAIA Benchmark AI Agent [link](#)

Tech Stack used: Python, Gradio, requests, pandas, openai, Hugging Face API, Groq API, Git LFS

 - Project Focus: Built an AI agent for GAIA benchmark evaluations using Python and Gradio.
 - Key Features: Integrated API handling, question answering, and result submission with error management.
 - Tech Optimization: Utilized Groq API, dotenv, and fallback mechanisms for reliable performance in various environments.

CERTIFICATES

- Hugging Face Agent Course
- Certified Cyber security hands-on workshop from NIT GOA & NFSU GOA
- Google Cloud Cybersecurity Certificate
- Google Cloud Computing Foundations Certificate
- Python Essentials 1 CISCO
- Cyber Threat Management CISCO

EDUCATION

Indrashil University	Gujarat, India
B-Tech CSE; GPA: 5.78	2022 - 2026
